EDUCATION

Chandigarh University

2021 – 2025

Bachelor of Engineering in Computer Science and Engineering (GPA: 8.73/10)

Mohali, Punjab

- **Relevant Coursework:** Object Oriented Programming, Data Structures and Algorithms (C++), Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Engineering

KC Mount Fort

2019 – 2021

Class XII (CBSE) – PCM, Scored: 92.6%

Muzaffarpur, Bihar

Sri Ramakrishana Vidyashala

2017 – 2019

Class X (KSEEB), Scored: 98.08%

Mysuru, Karnataka

EXPERIENCE

CoPrimes

Jan 2025 – Present

Software Development Intern

- Identified redundant API requests, implemented request batching and deduplication, cutting API calls 68% and overall latency 40%.
- Revamped client rendering and component architecture, implemented lazy loading and strategic prefetching, cutting content load 2.3s (45%) and improving user retention.
- Built automated payload validation pipeline integrated into CI, enforced pre-deploy checks and rollback, catching errors earlier and slashing production bugs 72% month over month.
- Led cache strategy design and rollout with incremental revalidation and multi-layer caching for heavy endpoints, reducing backend load by 55% in production.
- Standardized development stack and CI/CD pipelines (Next.js, Express.js, PostgreSQL, Docker, Git), reducing integration overhead and cutting deployment time by 35%.

PROJECTS

Course Hub | Next.js, React, Node.js, Express.js, React Query, Prisma ORM, NextAuth.js, PostgreSQL

[Live](#)

- Developed scalable backend APIs with Express.js and PostgreSQL, integrating authentication, course management, and secure payments using Stripe
- Implemented CI/CD pipelines via GitHub Actions and Railway, automating deployment for Next.js frontend & Node.js backend services
- Designed & launched a responsive marketplace UI with Next.js, using dynamic routing, framer motion animations, & Cloudinary storage
- Built real-time notification and email systems using Redis, BullMQ, and Resend, improving user engagement and platform reliability

Sudoku Arena | Next.js, React.js, Node.js, TypeScript, Prisma, Tailwind CSS

[Live](#)

- Built a multiplayer Sudoku platform with Next.js, TypeScript, and Supabase, supporting real-time gameplay and wallet management.
- Developed RESTful API endpoints & Socket.IO integration for live match updates, leaderboard tracking, & tournament management.
- Designed responsive UI components with Tailwind CSS, ensuring seamless experience across mobile, tablet, and desktop.
- Implemented secure authentication & user management using NextAuth.js, integrating OAuth providers & custom role-based access.

VirtuMeet | Next.js, React, WebRTC, Socket.IO, Stream.io

[Live](#)

- Built a meeting platform with Next.js, React, and Stream Video SDK, enabling real-time video calls and user authentication via Clerk.
- Implemented meeting scheduling, instant joining, & personal rooms, improving UX with custom Modals & intuitive navigation.
- Developed robust state management & optimized data fetching with Zustand & custom hooks, resulting in reliable meetings.

TECHNICAL AND SOFT SKILLS

Languages: C++, JavaScript, TypeScript

Frameworks & Libraries: React.js, Redux, Next.js, Node.js, Express.js, Tailwind CSS

Database & ORMs: MongoDB, PostgreSQL, Prisma

Cloud & DevOps: AWS (EC2, S3), Docker, CI/CD (GitHub Actions), Serverless Backend, Monorepo Architecture

Developer Tools: Git, GitHub, Postman

Soft Skills: Teamwork and Collaboration, Team Management, Adaptability, Problem Solving, Agile Practices

ACHIEVEMENTS

- Contributed merged pull requests to open-source projects during **Hacktoberfest**, showcasing open source collaboration proficiency.
- Achieved peak [LeetCode](#) rating of , demonstrating strong algorithmic problem solving skills.
- Secured 2nd place among 300+ teams in IEEE CUSB Code Genius coding competition.
- Led 'The Optimists' team at HackCBS Hackathon, winning the 'Best Use of GitHub' award.
