Education

Chandigarh University

2021 - 2025

Bachelor of Engineering in Computer Science and Engineering

Mohali, Punjab

- **Relevant Coursework:** Object Oriented Programming, Data Structures and Algorithms (C++), Database Management Systems(DBMS), Operating Systems, Computer Networks, Software Engineering

Experience

CoPrimes

Jan 2025 – Present

Software Development Intern

- Developed RESTful APIs using **Node.js** and **Express.js** to streamline data processing and integrate seamlessly with frontend applications, reducing API response time by 20%.
- Built a scalable educational platform using **Next.js** with server-side rendering and **TypeScript**, supporting 500+ concurrent users with optimized API endpoints.
- Developed a rich text editor using Lexical framework, enabling seamless multimedia content embedding and boosting student content interaction by 30%.
- Optimized **PostgreSQL** database performance by indexing 50+ tables and implementing **Redis** caching, reducing content loading time by 60%.

Projects

Course Hub | Next.js, React, Node.js, Express.js, React Query, Prisma ORM, NextAuth.js, PostgreSQL

🌐 [Live](#)

- Developed scalable course marketplace using **NextJS** and **ExpressJS** with **JWT** authentication and role based access control.
- Built comprehensive **Stripe** payment integration with **webhook** processing for secure purchases and automated enrollment.
- Implemented advanced **Cloudinary** video delivery with progress tracking and watermarking for enhanced student engagement.

VirtuMeet | Next.js, React, WebRTC, Socket.IO, Stream.io

🌐 [Live](#)

- Architected video conferencing platform using Next.js, TypeScript, and **Stream.io SDK** for real time HD calls.
- Implemented secure **Clerk** authentication with social sign on and responsive UI using **TailwindCSS** and **Shadcn/ui**.
- Engineered meeting management with instant/scheduled calls, personal rooms, and recordings using Next.js SSR.

Smart Scholar | Next.js, React.js, Node.js, TypeScript, Prisma, Groq API, Clerk, Tailwind CSS

🌐 [Live](#)

- Developed AI powered educational platform using Next.js, TypeScript, TailwindCSS featuring 10+ intelligent academic tools.
- Implemented secure **Clerk** authentication and integrated **Groq AI APIs** with Llama3 models for content generation.
- Engineered responsive chat interfaces with real time streaming, copy functionality, and enhanced user workflow efficiency.

Technical and Soft Skills

Languages: C++, JavaScript, TypeScript

Technologies/Framework: Node.js, React.js, Redux, ExpressJs, MongoDB, PostgreSQL, Prisma, NextJs, Docker, AWS, Serverless Backend, Monorepo, Payload CMS

Developer Tools: Git, GitHub

Soft Skills: Teamwork and Collaboration, Team Management, Adaptability, Problem Solving

Achievements

- Contributed merged pull requests during **Hacktoberfest**, showcasing open source collaboration proficiency.
- Achieved peak [LeetCode](#) rating 1541, demonstrating strong algorithmic problem solving skills.
- Secured 2nd place among 300+ teams in IEEE CUSB Code Genius coding competition.
- Led **The Optimists** at HackCBS Hackathon, winning Best Use of GitHub.
